

BIODYNAMIC TALK & FIELD DAY

An Introduction to biodynamics

With Peter and Gill Bacchus

All gardeners and farmers with an interest in biological, organic and biodynamic growing welcome. Bring your ideas and questions.

Evening Introductory Talk

On: Wednesday, 1 February 7.30 – 9.00pm

At: The Environment Centre, Riverton

Gill and Peter Bacchus will introduce biodynamics, as a system that can be used to improve soil, plant and animal health and sustainability and quality of produce

No charge

Workshop

On: Thursday, 2 February 10.30 am – 3.30 pm

At: Limehills

Programme

Discussions led by Peter Bacchus:

- the importance of oxygen in soil fertility
- the biodynamic preparations, how and when they are used on gardens and farms
- the conditions in which weeds flourish and ways to change those conditions

We will build a cow manure heap (for improving soil fertility) and make a weed tea (for weed management) and add biodynamic preparations to them

\$10 adult, \$15 couple
